Advisory

AD-2015-04

Multiple Vulnerabilities in HP Products

Original Issue Date: 02 April 2015

Severity Rating: **High**

Potential Security Impact: Remote disclosure of information

Software Affected:

- HP Insight Control server deployment versions v7.1.2, v7.2.0, v7.2.1, v7.2.2, v7.3.1
- HP Intelligent Provisioning 1.40 - 1.60 on Windows 2008 R2 and Windows 2012

Overview:

Multiple vulnerabilities have been identified in various HP products and they could be exploited by remote attackers to disclose information. HP has released an advisory to address the vulnerabilities.

Description:

Multiple vulnerabilities have been identified in various components of the HP Insight Control server deployment and HP Intelligent Provisioning. The vulnerabilities reported are as follows:

1. HP Insight Control server deployment on Linux and Windows, Remote Disclosure of Information

Multiple critical vulnerabilities have been identified with HP System Management Homepage (SMH), HP Smart Update Manager (SUM), and HP Version Control Agent (VCA) which are components of HP Insight Control server deployment. The vulnerabilities are related to the SSLv3 vulnerability known as “Padding Oracle on Downgraded Legacy Encryption” (POODLE). The components of HP Insight Control server deployment could be exploited by remote attackers to allow disclosure of information remotely.

2. HP Intelligent Provisioning, Disclosure of Information

A critical vulnerability has been identified with HP Intelligent Provisioning and this could be exploited by remote attackers to disclose information.

Solution

HP has provided the following update and instructions to resolve the above vulnerabilities. More information about the updates is available on:

1. *HP Insight Control server deployment on Linux and Windows, Remote Disclosure of Information*
