### Targeted Security Alert

#### Multiple Vulnerabilities in Microsoft Products

**Original Issue Date:** August 13, 2015

**Severity Rating:** High

**Description:**

Multiple vulnerabilities have been identified in Microsoft products and they can be exploited by remote attackers to cause execution of arbitrary code, gain knowledge of sensitive information, take full control of the affected systems and bypass security restrictions. The vulnerabilities reported are as follows:

Vulnerability	Description	Affected Software	Workarounds
<b>Multiple Vulnerabilities in Microsoft Internet Explorer</b>  <a href="#">CVE-2015-2423</a> <a href="#">CVE-2015-2441</a> <a href="#">CVE-2015-2442</a> <a href="#">CVE-2015-2443</a> <a href="#">CVE-2015-2444</a> <a href="#">CVE-2015-2445</a> <a href="#">CVE-2015-2446</a> <a href="#">CVE-2015-2447</a> <a href="#">CVE-2015-2448</a> <a href="#">CVE-2015-2449</a> <a href="#">CVE-2015-2450</a> <a href="#">CVE-2015-2451</a> <a href="#">CVE-2015-2452</a>	Multiple vulnerabilities have been identified in Internet Explorer and could be exploited to cause execution of arbitrary code. These vulnerabilities can allow remote attackers to view specially crafted webpage using Internet Explorer. Successful exploitation of the vulnerabilities could allow gaining the same user rights as the current user.	Internet Explorer 6 Internet Explorer 7 Internet Explorer 8 Internet Explorer 9 Internet Explorer 10 Internet Explorer 11	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/ms15-079">https://technet.microsoft.com/library/security/ms15-079</a>
<b>Vulnerabilities in Microsoft Graphics Component Could Allow Remote Code Execution</b>  <a href="#">CVE-2015-2432</a> <a href="#">CVE-2015-2458</a> <a href="#">CVE-2015-2459</a> <a href="#">CVE-2015-2460</a> <a href="#">CVE-2015-2461</a>	Multiple vulnerabilities have been identified in Microsoft Windows, Microsoft .NET Framework, Microsoft Office, Microsoft Lync, and Microsoft Silverlight. These vulnerabilities could allow remote attackers to cause execution of arbitrary code if a user opens a specially crafted document or visits an untrusted webpage that contains embedded TrueType or OpenType fonts.	Windows Vista Windows Server 2008 Windows 7 Windows Server 2008 R2 Windows 8 Windows 8.1 Windows Server 2012	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/ms15-080">https://technet.microsoft.com/library/security/ms15-080</a>

<a href="#">CVE-2015-2462</a>		Windows Server 2012 R2 Windows RT and Windows RT 8.1 Windows 10	
<b>Vulnerabilities in Microsoft Office Could Allow Remote Code Execution</b>  <b>CVE Info:</b> <a href="#">CVE-2015-1642</a> <a href="#">CVE-2015-2423</a> <a href="#">CVE-2015-2466</a> <a href="#">CVE-2015-2467</a> <a href="#">CVE-2015-2468</a> <a href="#">CVE-2015-2469</a> <a href="#">CVE-2015-2470</a> <a href="#">CVE-2015-2477</a>	Multiple vulnerabilities have been identified in Microsoft Office. These vulnerabilities could be exploited by remote attackers to cause execution of arbitrary code if a user opens a specially crafted Microsoft Office file. Successful exploitation could allow run arbitrary code in the context of the current user.	Microsoft Office 2007 Microsoft Office 2010 Microsoft Office 2013 Microsoft Office 2013 RT Microsoft Office for Mac 2011 Microsoft Office for Mac 2016	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/MS15-081">https://technet.microsoft.com/library/security/MS15-081</a>
<b>Vulnerability in RDP Could Allow Remote Code Execution</b>  <b>CVE Info:</b> <a href="#">CVE-2015-2472</a> <a href="#">CVE-2015-2473</a>	Multiple vulnerabilities have been identified in Microsoft Window. These vulnerabilities could allow execution of arbitrary code if an attacker places a specially crafted dynamic link library (DLL) file in the target user's current working directory and then convinces the user to open a Remote Desktop Protocol (RDP) file or to launch a program that is designed to load a trusted DLL file but instead loads the attacker's specially crafted DLL file. Successful exploitation of the vulnerabilities could allow remote attackers to take full control of the vulnerable systems and make modifications such as install programs, view, and change, delete data or create new accounts.	Windows Vista Windows Server 2008 Windows 7 Windows Server 2008 R2 Windows 8 and Windows 8.1 Windows Server 2012 and Windows Server 2012 R2 Windows RT and Windows RT 8.1	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/ms15-082">https://technet.microsoft.com/library/security/ms15-082</a>
<b>Vulnerability in Server Message Block Could Allow Remote Code Execution</b>  <b>CVE Info:</b> <a href="#">CVE-2015-2474</a>	A vulnerability has been identified in Microsoft Windows and can allow execution of arbitrary code if an attacker sends a specially crafted string to the SMB server error logging.	Windows Vista Windows Server 2008	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/ms15-083">https://technet.microsoft.com/library/security/ms15-083</a>
<b>Vulnerabilities in XML Core Services Could Allow Information Disclosure</b>	Multiple vulnerabilities have been reported in Microsoft Windows and Microsoft Office. The vulnerabilities could be exploited by remote attackers to allow information disclosure by	Windows Vista Windows Server 2008 Windows 7	Users are advised to apply updates. More information about the

<p><b>CVE Info:</b>  <a href="#">CVE-2015-2368</a>  <a href="#">CVE-2015-2369</a></p>	<p>either exposing memory address if a user clicks a specially crafted link or explicitly allowing the use of Secure Sockets Layer (SSL) 2.0. Successful exploitation of the vulnerability requires user interaction such that they have to click on a link by way of an enticement or Instant Messenger message.</p>	<p>Windows Server 2008 R2  Windows 8 and 8.1  Windows Server 2012 and Windows Server 2012 R2  Windows RT and Windows RT 8.1</p>	<p>updates is available in:  <a href="https://technet.microsoft.com/library/security/ms15-084">https://technet.microsoft.com/library/security/ms15-084</a></p>
<p><b>Vulnerability in Mount Manager Could Allow Elevation of Privilege</b></p> <p><b>CVE Info:</b>  <a href="#">CVE-2015-1769</a></p>	<p>A vulnerability has been reported in Microsoft Windows. The vulnerability can allow elevation of privilege if an attacker inserts a malicious USB device into a target system. Successful exploitation of the vulnerability could allow remote attackers to write a malicious binary to disk and execute it.</p>	<p>Windows Vista  Windows Server 2008  Windows 7  Windows Server 2008 R2  Windows 8 and Windows 8.1  Windows Server 2012 and Windows Server 2012 R2  Windows RT and Windows RT 8.1  Windows 10</p>	<p>Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/MS15-085">https://technet.microsoft.com/library/security/MS15-085</a></p>
<p><b>Vulnerability in System Center Operations Manager Could Allow Elevation of Privilege</b></p> <p><b>CVE Info:</b>  <a href="#">CVE-2015-2420</a></p>	<p>A vulnerability has been identified in Microsoft System Center Operations Manager. The vulnerability could allow elevation of privilege if a user visits an affected website by way of a specially crafted URL.</p>	<p>Microsoft System Center 2012 Operations Manager  Microsoft System Center 2012 Operations Manager R2</p>	<p>Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/en-us/library/security/MS15-086">https://technet.microsoft.com/en-us/library/security/MS15-086</a></p>
<p><b>Vulnerability in UDDI Services Could Allow Elevation of Privilege</b></p> <p><b>CVE Info:</b>  <a href="#">CVE-2015-2364</a></p>	<p>A vulnerability has been identified in Microsoft Windows and can be exploited by remote attackers to allow elevation of privilege if an attacker engineered a cross-site scripting (XSS) scenario by inserting a malicious script into a webpage search parameter. Successful exploitation of the vulnerability requires user interaction such that the user would have to visit a specially crafted webpage where the malicious script would then be executed.</p>	<p>Windows Server 2008  Microsoft BizTalk Server</p>	<p>Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/MS15-087">https://technet.microsoft.com/library/security/MS15-087</a></p>
<p><b>Vulnerabilities in Microsoft Windows Could Allow Elevation of Privilege</b></p>	<p>Multiple vulnerabilities have been identified in Microsoft Windows. The vulnerabilities could allow elevation of privilege if an attacker logs on to an affected system and runs a specially crafted application or convinces a user to open</p>	<p>Windows Vista  Windows Server 2008  Windows 7  Windows Server</p>	<p>Users are advised to apply updates. More information about the updates is available in:</p>

<b>CVE:</b> <a href="#">CVE-2015-2428</a> <a href="#">CVE-2015-2429</a> <a href="#">CVE-2015-2430</a>	a specially crafted file that invokes a vulnerable sandboxed application, allowing an attacker to escape the sandbox.	2008 R2 Windows 8 and Windows 8.1	<a href="https://technet.microsoft.com/library/security/MS15-090">https://technet.microsoft.com/library/security/MS15-090</a>
<b>Cumulative Security Update for Microsoft Edge</b>  <b>CVE Info:</b> <a href="#">CVE-2015-2371</a>	Multiple vulnerabilities have been identified in Microsoft Edge. The vulnerabilities could allow remote code execution if a user views a specially crafted webpage using Microsoft Edge. Successful exploitation of the vulnerabilities can allow remote attackers to gain the same user rights as the current user.	Microsoft Edge	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/MS15-091">https://technet.microsoft.com/library/security/MS15-091</a>
<b>Vulnerabilities in .NET Framework Could Allow Elevation of Privilege</b>  <b>CVE Info:</b> <a href="#">CVE-2015-2481</a> <a href="#">CVE-2015-2480</a> <a href="#">CVE-2015-2479</a>	Multiple vulnerabilities have been identified in Microsoft Windows. The vulnerabilities could allow elevation of privilege if used in conjunction with another vulnerability that allows arbitrary code to be run.	Windows Vista Windows Server 2008 Windows 7 Windows Server 2008 R2 Windows 8 and Windows 8.1 Windows Server 2012 and Windows Server 2012 R2 Windows RT and Windows RT 8.1	Users are advised to apply updates. More information about the updates is available in:  <a href="https://technet.microsoft.com/library/security/MS15-092">https://technet.microsoft.com/library/security/MS15-092</a>
